

## Value Driven Strategy for Dairy Farm Projects

Comprehensive Solutions for a Competitive, Profitable Dairy Farm

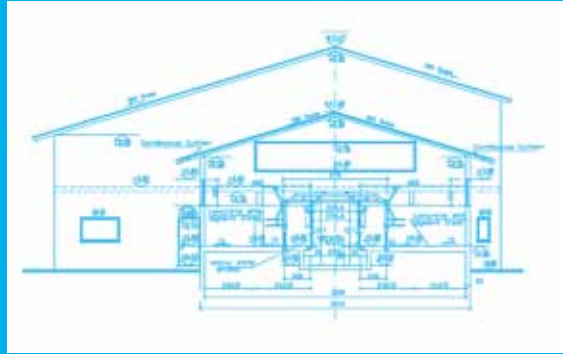

## Value Driven Dairy Farms

S.A.E. Afikim is a world leader in computerized dairy management systems and electronic milk meters. AlefBet Planners is the leading Israeli design firm for farm enterprise.

An alliance between these two Israeli market leaders provides comprehensive solutions for modern, industrial dairy farms. Implementation of the most advanced technologies together with professional engineering and construction management, contribute to the dairy farms' long term success. Our projects ensure the highest quality performance, cost effective budgets, short design and construction schedule, smooth running-in, high yield and low operational costs for the new dairy farm.

## Innovative Solutions Based on Israeli Unique Know-How

The strength of the alliance is based on the vast experience of the Israeli rural sector, where agricultural and industrial enterprises are governed by the community. Consequently, our engineering teams have accumulated decades of experience in dealing with ecological issues, in different types of climate, heat stress conditions, water shortage and other limited resources.

Our technology, which is based on the concept "Management by Exceptions" enables the farm manager to pinpoint problematic or unusual behavior of each individual cow in the herd and to resolve its problem. This concept enhances the herd yield and the milk productivity.

The key to our success is the integration of effective solutions together with efficient project management, professional coaching, and high milk productivity of the herd.

### Services that Form the Route to Success

Our flexibility allows us to provide each of our services, up to Turn-Key projects, per the customer's needs.

The main technical services include:

- Comprehensive consultancy
- Feasibility studies and business plans
- Farm layout and detailed design
- EPCM (Engineering, Procurement, Construction Management) or Turn-Key project services
- Automated milking parlors & milking centers
- Computerized dairy management systems
- Comprehensive dairy farm training and technical support

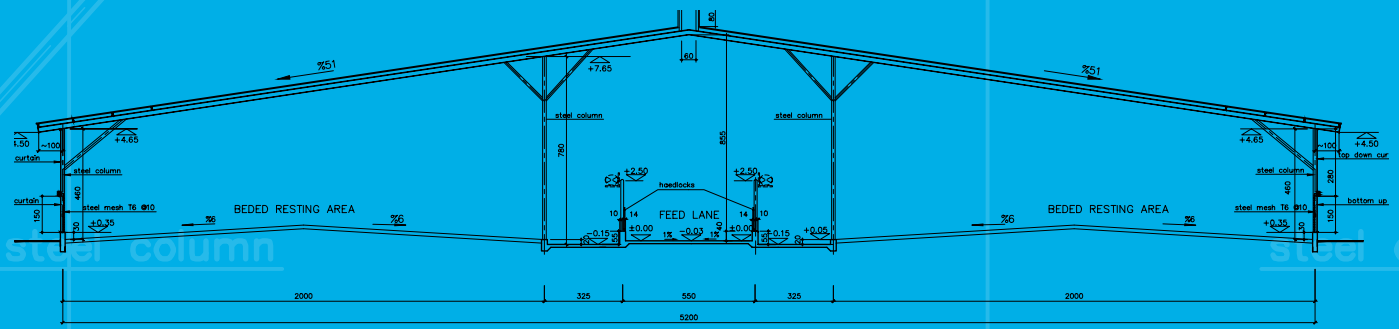

### Ensuring High Efficiency in Dairy Farming

Based on our field-proven experience, our project teams have installed dairy farms and milking centers in India, Vietnam, Mexico, Nigeria, Spain, Romania, Russia, China, South Africa and Israel, ensuring maximum professional results and long term success.

We are committed to reliable and cost effective design, including "state-of-the-art" equipment which enables smooth project implementation, efficient operation and fast return on the investment.
